Backend Developer with 4+ years of experience designing and developing scalable web applications and high-performance RESTful APIs using Laravel, MySQL, and PostgreSQL. Experienced in building enterprise applications, implementing Laravel Queues with Redis for asynchronous processing, integrating third-party APIs, and developing real-time features using WebSocket. Proficient in database optimization, system design, authentication & authorization, RBAC, CI/CD pipelines, AWS deployment, Docker, Linux server administration, and production application monitoring. Strong experience leading development teams, collaborating directly with clients, planning Agile sprints, and delivering secure, scalable, and maintainable software solutions.

Experience

Application Developer
Web Idea Solution LLP

New Town, Kolkata

Jan 2026 - Present

- Develop scalable web applications using Laravel, Django, FastAPI, MySQL, PostgreSQL, and REST APIs.
- Build secure, high-performance, scalable APIs with optimized database design.
- Communicate directly with clients for requirement gathering, feature discussions, updates, and issue resolution.
- Plan sprints, estimate tasks, manage priorities, and ensure timely project delivery.
- Lead a team of 8-10 developers through task allocation, code reviews, debugging, and technical support.
- Deploy, manage, monitor, and debug live applications on AWS and VPS servers using Linux, Git, Nginx/Apache, SSL, and databases.

Full Stack Developer
Leelija Web Solutions Private Limited

Barasat, Kolkata

Oct 2021 - Dec 2025

- Built and maintained web applications using Core PHP, Laravel, Django, React.js, MySQL, and PostgreSQL.
- Created scalable RESTful APIs using Laravel, Django REST Framework with authentication, validation, and role-based access control.
- Worked on SaaS, POS, booking, finance, management, and business automation projects.
- Led a team of 7-8 developers, handled task allocation, code review, debugging, and delivery planning.
- Deployed and managed live projects on VPS/cloud servers, including Linux, Nginx/Apache, SSL, Git, database setup, and production debugging.
- Resolved live production issues related to APIs, databases, server configuration, performance, and application bugs.

Projects

Integrated Healthcare Management System (SaaS)

Technologies Used: Core PHP, MySQL, JavaScript, Bootstrap, jQuery, AJAX, React.js, Django

- Built a modular architected Complete Healthcare Management system for patient registration, doctor appointments, pathology lab tests, pharmacy inventory, GST billing, and reporting.
- Developed role-based portals for Admin, Doctor, Receptionist, Lab, Pharmacy, and Patients.
- Implemented appointment scheduling, patient queue management, lab test booking, report generation, medicine stock tracking, expiry management, and pharmacy billing.
- Created GST invoices, payment tracking, low-stock alerts, sales reports, revenue reports, and operational dashboards.
- Developed a React.js landing page integrated with Django REST APIs for secure order processing and user registration.
- Implemented and maintained CI/CD pipelines using Git, Jenkins, and automated deployment workflows for production.

Grocery Store POS

Technologies Used: Laravel, JavaScript, PostgreSQL

- Developed a grocery store POS system with billing, invoice generation, discounts, tax calculation, and thermal receipt printing.
- Built real-time inventory tracking for stock purchases, sales deductions, returns, damaged items, low-stock alerts, and product expiry monitoring.
- Implemented product, supplier, customer, purchase, sales, and role-based user management modules.
- Created sales, profit, inventory, purchase, and revenue reports with dashboard analytics for business decision-making.
- Used Laravel and PostgreSQL to build a secure, scalable, and reliable retail management solution.

Guest Post Marketplace SaaS

Technologies Used: Laravel, React, PostgreSQL,

SaaS-based Guest Post Marketplace connecting publishers and buyers through a centralized platform.

- Implemented JWT-based authentication and role-based access control for secure user management.
- Built subscription/package-based access with usage limits, feature restrictions, and plan management.
- Developed publisher listing, order management, website filtering, and guest post purchasing workflows.
- Designed RESTful APIs and optimized PostgreSQL queries for better scalability and performance..
- Integrated payment processing, transaction tracking, and user activity monitoring features.

Full Stack Service and CMS Application

Technologies Used: Laravel, JavaScript, HTML, CSS, Bootstrap, MySQL

- Developed a service management and CMS platform with dynamic service pages and blog publishing.
- Implemented CRM modules for lead management, customer tracking, inquiry handling, and follow-up management.
- Integrated AWS S3 for secure file and media storage.
- Built user authentication, role-based access control, and admin management features.
- Created SEO-friendly content structures and a fully responsive user interface.
- Deployed and maintained CI/CD pipelines using Git, Git Actions and automated deployment workflows on AWS cloud infrastructure.

Badminton Game & Tournament Platform

Technologies Used: Laravel, PostgreSQL, Firebase, AWS

- A badminton tournament and player management platform with match scheduling, registrations, and participant management.
- Implemented secure authentication, user management, and partner-based payment workflows.
- Developed 200+ RESTful API endpoints supporting tournament operations, payments, and player management.
- Optimized database queries and application performance for efficient data handling.
- Implemented Laravel Queue Jobs for notification processing, improving system performance and user experience.
- Maintained scalable architecture with role-based access control and business logic management.

Education

Computer Science and Engineering

Birbhum Institute of Engineering and Technology

Suri - WB

2021 - 2024

Computer Science and Technology

Raja Ranjit Kishore Govt Polytechnic

Jhargram - WB

2018 - 2021

SKILLS

-
- **Programming Languages:** PHP, Java, Python, JavaScript
 - **Frameworks & Libraries:** Laravel, Django, React.js
 - **Backend & Databases:** RESTful APIs, JWT, PostgreSQL, MySQL, Redis
 - **Tools & Platforms:** Git, GitHub, AWS, VPS, Docker, Jenkins, Postman, JIRA
